---

SCCI PERMIT #1024

Survey Date: 2 Feb. 2019

Surveyors: Daniel Istvanko; Chris Ogle

TWRA conducted a biannual winter census at Run to the Mill Cave, Cumberland County, TN. Due to impending rainfall, only the upper sections of the cave were surveyed for bats. In previous years, surveys were concluded shortly after counting the cluster of MYSO located toward the entrance of the cave. This additional survey effort likely resulted in the increase in observed PESU numbers. We counted 7 MYLU - Little brown bat, 18 MYSO – Indiana bat, and 45 PESU - Tricolored bat for a total of 70 individuals. No visible signs of white-nose syndrome (Pd) were documented during this survey.
